 - Unity
 - Unreal Engine
 - Godot
- **Areas**
 - Gameplay Systems
 - AI
 - Debugging

Selected Projects

Dog Knight: Adventure

Unity | C# | [Play on Itch.io](#) |

An action RPG featuring character movement & progression, spells, and a final boss. I developed the enemy and talent systems, optimized large-scale enemy handling using ScriptableObjects and a centralized backend manager, and implemented persistent saving for player levels and talents. Designed a prerequisite-based talent tree to support structured character progression.

Psycho Simulator

Unity | C# |

Developed a GTA-inspired game prototype within four weeks. Responsible for implementing player input and movement, aiming, projectile and weapon systems, reloading, health and regeneration, camera controls, HUD elements, collectibles, and visual effects.

Gromp

Unity | C# | Mobile |

Sokoban-style mobile puzzle game focused on placing and kicking boxes. Implemented swipe controls, a save system, and a steady introduction of new mechanics to support player learning and progression.

All in Vania

Unity | C# | Mobile |

2D platformer inspired by classic Castlevania, developed in C# and Unity. Focused on recreating the original games' atmosphere, movement, combat, and overall gameplay feel.

RPG Pet Project

Unity | C# | Mobile |

Mobile idle battler developed in Unity, featuring pet leveling, automated battles against enemies and bosses, monster training, and an in-game shop. Created as an iterative side project to explore idle game design and progression systems.

Project Archon

Unreal | C++ | Blueprints |

A first-person puzzle game inspired by *P.T.*, *The Stanley Parable*, *The Room*, and *Exit 8*. After crash-landing on a distant planet, a space ranger becomes trapped in a time-loop simulation created by a rogue AI attempting to revive a 500-year-old project to build a robot society and conquer Earth.

Education

Forsbergs Skola – Game Programming

2025 October – Currently

C#, C++, Git, Unity, Unreal, Godot, CI/CD

NTI – Leadership & Entrepreneurship

2017 – 2020

Agile Project Management, Team Building & Small Business Economics

Relevant Experience

Fortum AB

Process Specialist Sep 2022 – Oct 2024

- Managed sales channels, automation, and campaign implementation in collaboration with external sales partners, IT, and cross-functional teams. Used Jira, SQL, and process-analysis methods to identify workflow gaps, define improvement requirements, and enhance end-to-end sales and customer experiences.
- Participated in workshops and collaborated with the Norwegian and Finnish branches while independently managing the Swedish market for Fortum within the department. Applied Lean principles and other continuous-improvement practices to streamline processes and strengthen team collaboration.
